KRISHNA SHINDE

.NET Developer | C# • ASP.NET Core • Web API • SQL Server

Pune, Maharashtra, India +91 8010393996 krishnashinde8975@gmail.com

PROFESSIONAL SUMMARY

.NET Developer with **2.5+ years** of experience designing, building and modernizing enterprise web applications in the Transport and Logistics domain. Strong command of C#, ASP.NET Core, .NET 6, RESTful Web APIs, Entity Framework and SQL Server, with a record of upgrading legacy systems, integrating third-party APIs, tuning performance and delivering secure, scalable solutions. Comfortable owning features end to end, from requirement analysis to development, testing, code review and production support.

TECHNICAL SKILLS

Backend	C#, ASP.NET Core, .NET 6, .NET Core, .NET Framework, ASP.NET MVC, Web API
Data & Reporting	SQL Server, Entity Framework, LINQ, SSRS
Architecture	RESTful API Design, SOLID Principles, Design Patterns
Security & Integrations	JWT, OAuth, Google Drive API, SIM Tracking API, WhatsApp API, SMS & Email Gateways
Tools & Version Control	Git, GitHub, SVN, Postman, Jira
Frontend	JavaScript, jQuery, Angular, HTML5, CSS3, Bootstrap

PROFESSIONAL EXPERIENCE

Software Engineer (.NET Developer) — Rafai Technologies Pvt Ltd

Apr 2024 – Present

Pune, Maharashtra

- Design and develop scalable transport-domain applications using **C#, ASP.NET Core, .NET 6, Web API, SQL Server, SSRS** and JavaScript.
- Build and consume **RESTful APIs** following SOLID principles and clean, maintainable code practices.
- **Lead modernization** of legacy systems by migrating them to current .NET technologies, improving efficiency, performance and user experience.
- Diagnose and resolve complex production issues with a focus on performance tuning, security and scalability.
- Work with business analysts, developers and support teams to define specifications; use Git for branching, merging and peer code reviews.

KEY PROJECTS

Web Transport System

C# • ASP.NET Core • MVC • Web API • SQL Server • Entity Framework • LINQ • JavaScript

- Architected a logistics platform covering transport operations, warehouse management and distribution networks.
- Built RESTful APIs with Entity Framework and LINQ to optimize warehouse and distribution workflows.
- Reduced delivery times by **20%**, directly improving customer satisfaction.

SIM Tracking API Integration

C# • ASP.NET Core • Web API • REST • JSON • SQL Server • Schedulers

- Integrated third-party SIM-based tracking APIs into the transport system for live vehicle and driver location monitoring.
- Developed an ASP.NET Core API layer to authenticate with the provider, consume REST endpoints, parse JSON responses and store tracking history in SQL Server.
- Implemented scheduled background jobs for periodic location updates and trip status tracking.

Automated File & Communication Management System

C# • ASP.NET Core • Google Drive API • SQL Server • JavaScript

- Developed secure APIs for file upload, retrieval and two-way synchronization between local storage and Google Drive.
- Built an automated communication suite: scheduled bulk email with customizable templates, real-time WhatsApp API messaging, and bulk SMS dispatch with delivery tracking.

EDUCATION

M.Sc. (Computer Application) — Pune University
B.Sc. (Computer Application) — Pune University, 2022
